

Comments relating to the School	
School should be resited to Cottage Road to give the playing field space and to solve the parking problems outside its present site (16/06/10)	Any of the sites would be better a future-proofed option than expansion on the current site. Of the three options provided B may provide better access but C could provide scope for better associated leisure facilities. Option A would be the least good given views to the Faringdon Folly (16/06/18)
I agree Cottage Road is a good site (16/06/18)	I much prefer sites A/C (Cottage Road) to provide the kind of first class facilities this village should have. I am concerned that sites A/C will encourage further housing development, with school capacity being used by developers as a reason. I'm not informed enough to choose between options A and C (16/06/18)
Option A appears to be the best option, unsure that option B would provide enough space long term. (17/06/18)	Bringing a larger school to Stanford would benefit children who were unable to obtain a placement who live in the village. At present our children attend a school 5 miles away due to lack of space at Stanford School. (17/06/18)
Do not expand or move the school, which should remain in the traditional centre of the village, close to the church it is linked to. (17/06/18)	Don't use the Millennium Green for school expansion. It should remain protected (17/06/18)
Plans look really good. I think C is the best site but would be happy with A if the cost were lower for the local council to deliver. The current school is great but we will need a bigger one soon. (17/06/18)	
Other comments	
Grass snake living in the hedge of Millennium Green. Encourage more flora and fauna. [Provide] extra rubbish bin for the top end near seats. (17/06/18)	Clear the bridle path – grass is too high to use. Van Diemens footpath needs cutting back. (17/06/18)
To ensure all infrastructure is in place before expansion. Be prepared! (17/06/18)	Support is needed to keep the Chapel in Chapel Road as a public building, currently owned by the Wessex Trust who did want to sell it. (17/06/18)
I should like to see grass areas less mown and more wildlife/flower friendly – such as the wide verge opposite the Horse and Jockey and Upper Green. All new housing should require measure such as solar panels and rainwater harvesting, less hard paving and not solid fencing to facilitate access through for wildlife. (17/06/18)	[Wildlife survey] Toads to add to the species list (17/06/18)
No Boules/Petanque facility. Previously suggested when requested for ideas. Nearest is Highworth and Swindon. Interesting for retired residents!! (17/06/18)	

Site A is the QEII field between Cottage Road and the A417

Site B is the Football Field

Site C is the field adjacent to the QEII field north of Cottage Road
